Preface to Second Edition	xxvii
Summary Tables	xxix
Frequently Used Notations	xxxvii
Abbreviations	xli
1 Medical Uncertainties	1
1.1 Uncertainties in Health and Disease	2
1.1.1 Uncertainties Due to Intrinsic Variation	3
1.1.1.1 Biologic Variability	3
1.1.1.2 Genetic Variability	3
1.1.1.3 Variation in Behavior and Other Host Factors	4
1.1.1.4 Environmental Variability	4
1.1.1.5 Chance Variability.....	4
1.1.1.6 Sampling Fluctuation	5
1.1.2 Natural Variation in Assessment.....	5
1.1.2.1 Observer Variability	5
1.1.2.2 Variability in Treatment Strategies	6
1.1.2.3 Instrument and Laboratory Variability.....	6
1.1.2.4 Imperfect Tools	7
1.1.2.5 Incomplete Information on the Patient	7
1.1.2.6 Poor Compliance with the Regimen	7
1.1.3 Inadequate Knowledge.....	8
1.1.3.1 Epistemic Uncertainties.....	8
1.1.3.2 Diagnostic, Therapeutic, and Prognostic Uncertainties.....	8
1.1.3.3 Predictive and Other Uncertainties	9
1.2 Uncertainties in Medical Research	9
1.2.1 Empiricism in Medical Research	10
1.2.1.1 Laboratory Experiments	10
1.2.1.2 Clinical Trials.....	10
1.2.1.3 Surgical Procedures.....	10
1.2.1.4 Epidemiological Research.....	11
1.2.2 Elements of Minimizing the Impact of Uncertainties on Research	11
1.2.2.1 Proper Design.....	12

1.2.2.2	Improved Medical Methods	12
1.2.2.3	Analysis and Synthesis.....	13
1.2.3	Critique of a Report of a Medical Study	13
1.2.3.1	Introduction	14
1.2.3.2	Methodology	14
1.2.3.3	Results	15
1.2.3.4	Discussion and Conclusions.....	16
1.3	Uncertainties in Health Planning and Evaluation.....	16
1.3.1	Health Situation Analysis.....	17
1.3.1.1	Identification of the Specifics of the Problem.....	17
1.3.1.2	Size of the Target Population.....	18
1.3.1.3	Magnitude of the Problem	19
1.3.1.4	Health Infrastructure.....	20
1.3.1.5	Feasibility of Remedial Steps	21
1.3.2	Evaluation of Health Programs	21
1.4	Management of Uncertainties: About This Book.....	22
1.4.1	Contents of the Book	23
1.4.2	Salient Features of the Text	25
1.4.2.1	System of Notations	26
1.4.2.2	Guide Chart of the Biostatistical Methods.....	27
	References	27
2	Basics of Medical Studies	29
2.1	Study Protocol.....	30
2.1.1	The Problem, Objectives, and Hypotheses	30
2.1.1.1	The Problem	30
2.1.1.2	Objectives.....	31
2.1.1.3	Hypotheses	31
2.1.2	Protocol Content	32
2.2	Types of Medical Studies	35
2.2.1	Elements of Design.....	36
2.2.1.1	Broad Objective of the Study	37
2.2.2	Basic Types of Study Design.....	38
2.2.2.1	Descriptive Studies.....	38
2.2.2.2	Analytical Studies	40
2.2.2.3	Basic Types of Analytical Studies	40
2.2.3	Choosing a Design.....	41
2.2.3.1	Recommended Design for Particular Setups	41
2.2.3.2	Choice of Design by Level of Evidence.....	42
2.3	Data Collection	44
2.3.1	Nature of Data.....	44
2.3.1.1	Factual, Knowledge-Based, and Opinion-Based Data... 44	
2.3.1.2	Method of Obtaining the Data	45
2.3.2	Tools of Data Collection.....	46
2.3.2.1	Existing Records	46
2.3.2.2	Questionnaires and Schedules.....	47

2.3.3	Pretesting and Pilot Study.....	49
2.4	Nonsampling Errors and Other Biases	49
2.4.1	Nonresponse.....	50
2.4.2	Variety of Biases to Guard Against.....	50
2.4.2.1	List of Biases.....	50
2.4.2.2	Steps for Minimizing Bias	56
References	58
3	Sampling Methods	59
3.1	Sampling Concepts	59
3.1.1	Advantages and Limitations of Sampling.....	60
3.1.1.1	Sampling Fluctuations.....	60
3.1.1.2	Advantages of Sampling	61
3.1.1.3	Limitations of Sampling.....	61
3.1.2	Some Special Terms Used in Sampling	61
3.1.2.1	Unit.....	61
3.1.2.2	Sampling Frame	62
3.1.2.3	Parameters and Statistics.....	62
3.1.2.4	Sample Size.....	62
3.1.2.5	Nonrandom and Random Sampling.....	63
3.2	Common Methods of Random Sampling	63
3.2.1	Simple Random Sampling	63
3.2.2	Stratified Random Sampling	64
3.2.3	Multistage Random Sampling.....	67
3.2.4	Cluster Random Sampling	68
3.2.5	Systematic Random Sampling	70
3.2.6	Choice of Method of Random Sampling.....	72
3.3	Some Other Methods of Sampling	72
3.3.1	Other Random Methods of Sampling	73
3.3.1.1	Probability Proportional to Size Sampling	73
3.3.1.2	Area Sampling.....	74
3.3.1.3	Inverse Sampling.....	74
3.3.1.4	Consecutive Subjects Attending a Clinic.....	74
3.3.1.5	Sequential Sampling.....	75
3.3.2	Nonrandom Methods of Sampling.....	75
3.3.2.1	Convenience Samples	75
3.3.2.2	Other Types of Purposive Samples.....	76
3.4	Some Examples of Sample Surveys	77
3.4.1	National Health and Nutrition Examination Survey in the United States.....	77
3.4.1.1	Sample Design	77
3.4.1.2	Logistics and Other Details.....	78
3.4.2	A Small-Scale Survey of an Elderly Population in Australia	78
3.4.2.1	Sample Design	79
3.4.2.2	Logistics and Other Details.....	79
References	80

4	Designs for Observational Studies	81
4.1	Prospective Studies	84
4.1.1	Variations of Prospective Studies	84
4.1.1.1	Cohort Study	84
4.1.1.2	Longitudinal Study.....	86
4.1.2	Comparison Group in a Prospective Study	86
4.1.3	Selection of Subjects for a Prospective Study	87
4.1.4	Potential Biases in Prospective Studies	88
4.1.4.1	Selection Bias.....	88
4.1.4.2	Bias Due to Loss in Follow-up.....	88
4.1.4.3	Assessment Bias and Errors.....	89
4.1.4.4	Bias Due to Change in the Status	89
4.1.4.5	Confounding Bias	89
4.1.4.6	Post Hoc Bias	90
4.1.4.7	Validity Bias.....	90
4.1.5	Merits and Demerits of Prospective Studies.....	90
4.1.5.1	Merits of Prospective Studies	90
4.1.5.2	Demerits of Prospective Studies	91
4.2	Retrospective Studies	91
4.2.1	Case-Control Design	92
4.2.1.1	Nested Case-Control Design	93
4.2.2	Selection of Cases and Controls	94
4.2.2.1	Sampling Methods in Retrospective Studies	94
4.2.2.2	Confounders and Matching.....	95
4.2.3	Merits and Demerits of Case-Control Studies	96
4.2.3.1	Merits of Case-Control Studies.....	96
4.2.3.2	Demerits of Case-Control Studies.....	96
4.3	Cross-Sectional Studies.....	97
4.3.1	Selection of Subjects for a Cross-Sectional Study	98
4.3.2	Merits and Demerits of Cross-Sectional Studies	98
4.3.2.1	Demerits of Cross-Sectional Studies.....	98
4.3.2.2	Merits of Cross-Sectional Studies.....	99
4.4	Comparative Performance of Prospective, Retrospective, and Cross-Sectional Studies.....	100
4.4.1	Performance of Prospective Studies	101
4.4.2	Performance of Retrospective Studies	103
4.4.3	Performance of Cross-Sectional Studies.....	103
	References	104
5	Medical Experiments	107
5.1	Basic Features of Medical Experiments	108
5.1.1	Statistical Principles of Experimentation	109
5.1.1.1	Control Group	109
5.1.1.2	Randomization	110
5.1.1.3	Replication	110
5.1.2	Advantages and Limitations of Experiments.....	111

5.1.2.1	Advantages	111
5.1.2.2	Limitations.....	112
5.2	Design of Experiments.....	112
5.2.1	Classical Designs: One-Way, Two-Way, and Factorial	113
5.2.1.1	One-Way Design.....	113
5.2.1.2	Two-Way Design	114
5.2.1.3	K-Way and Factorial Experiments.....	116
5.2.2	Some Unconventional Designs	117
5.2.2.1	Repeated Measures Design	117
5.2.2.2	Crossover Design	118
5.2.2.3	Other Complex Designs	120
5.3	Choice and Sampling of Units for Laboratory Experiments.....	120
5.3.1	Choice of Experimental Unit	121
5.3.2	Sampling Methods in Laboratory Experiments	122
5.3.3	Choosing a Design of Experiment.....	123
	References.....	123
6	Clinical Trials	125
6.1	Therapeutic Trials	126
6.1.1	Phases of a Clinical Trial.....	126
6.1.1.1	Phase I Trial	126
6.1.1.2	Phase II Trial.....	126
6.1.1.3	Phase III Trial.....	127
6.1.1.4	Phase IV: Postmarketing Surveillance	128
6.1.2	Selection of Subjects.....	128
6.1.2.1	Selection of Participants for RCT	129
6.1.2.2	Control Group in a Clinical Trial.....	130
6.1.3	Randomization and Matching	132
6.1.3.1	Randomization	132
6.1.3.2	Matching.....	133
6.1.4	Methods of Random Allocation.....	134
6.1.4.1	Allocation out of a Large Number of Available Subjects	134
6.1.4.2	Random Allocation of Consecutive Patients Coming to a Clinic.....	134
6.1.5	Blinding and Masking.....	136
6.1.5.1	Blinding.....	136
6.1.5.2	Masking.....	137
6.2	Issues in Clinical Trials	138
6.2.1	Efficacy, Effectiveness, and Pragmatic Trials.....	138
6.2.1.1	End points or Outcome	138
6.2.1.2	Causal Inference.....	139
6.2.1.3	Side Effects	139
6.2.2	Various Equivalences in Clinical Trials	140
6.2.2.1	Superiority, Equivalence, and Noninferiority Trials....	140
6.2.2.2	Therapeutic Equivalence and Bioequivalence	141

6.2.3	Designs for Clinical Trials	142
6.2.3.1	One-Way, Two-Way, and Factorial Designs	142
6.2.3.2	Crossover and Repeated Measures Designs	142
6.2.3.3	N-of-1, Up-and-Down, and Sequential Designs	143
6.2.3.4	Choosing a Design for a Clinical Trial.....	145
6.2.4	Biostatistical Ethics for Clinical Trials	146
6.2.4.1	Equipoise	146
6.2.4.2	Ethical Cautions	147
6.2.4.3	Statistical Considerations in a Multicentric Trial.....	148
6.2.4.4	Multiple Treatments with Different Outcomes in the Same Trial.....	148
6.2.4.5	Size of the Trial.....	148
6.2.4.6	Compliance.....	149
6.2.5	Reporting Results of a Clinical Trial	149
6.2.5.1	CONSORT	150
6.2.5.2	Open Access.....	150
6.3	Trials Other than for Therapeutics.....	151
6.3.1	Clinical Trials for Diagnostic and Prophylactic Modalities	151
6.3.1.1	Diagnostic Trials	151
6.3.1.2	Prophylactic Trials in Clinics.....	152
6.3.2	Field Trials for Screening, Prophylaxis, and Vaccines.....	153
6.3.2.1	Screening Trials.....	153
6.3.2.2	Prophylactic Trials in the Field.....	154
6.3.2.3	Vaccine Trials	154
6.3.3	Issues in Field Trials	155
6.3.3.1	Randomization and Blinding in Field Trials	155
6.3.3.2	Designs for Field Trials	156
	References	156
7	Numerical Methods for Representing Variation	159
7.1	Types of Measurement.....	159
7.1.1	Nominal, Metric, and Ordinal Scales.....	160
7.1.1.1	Nominal Scale	160
7.1.1.2	Metric Scale.....	161
7.1.1.3	Ordinal Scale.....	161
7.1.1.4	Grouping of a Metric Scale.....	162
7.1.2	Other Classifications of the Types of Measurement.....	164
7.1.2.1	Discrete and Continuous Variables.....	164
7.1.2.2	Qualitative and Quantitative Data.....	165
7.1.2.3	Stochastic and Deterministic Variables.....	166
7.2	Tabular Presentation	166
7.2.1	Contingency Tables and Frequency Distribution	167
7.2.1.1	Empty Cells.....	168
7.2.1.2	Problems in Preparing a Contingency Table on Metric Data	169
7.2.2	Multiple Response Tables and Other Features	169

7.2.2.1	Features of a Table.....	170
7.2.3	Other Statistical Tables.....	171
7.2.3.1	What Is a Good Statistical Table?	171
7.3	Rates and Ratios	172
7.3.1	Proportion, Rate, and Ratio.....	172
7.3.1.1	Proportion.....	172
7.3.1.2	Rate	172
7.3.1.3	Ratio	173
7.4	Central and Other Locations	174
7.4.1	Central Values: Mean, Median, and Mode.....	174
7.4.1.1	Understanding Mean, Median, and Mode	174
7.4.1.2	Calculation in Case of Grouped Data.....	175
7.4.1.3	Which Central Value to Use?	176
7.4.1.4	Geometric Mean.....	178
7.4.1.5	Harmonic Mean.....	178
7.4.2	Other Locations: Quantiles	180
7.4.2.1	Quantiles in Ungrouped Data.....	180
7.4.2.2	Quantiles in Grouped Data.....	180
7.4.2.3	Interpretation	182
7.5	Measuring Variability	183
7.5.1	Variance and Standard Deviation	184
7.5.1.1	Variance and Standard Deviation in Ungrouped Data.....	185
7.5.1.2	Variance and Standard Deviation in Grouped Data.....	186
7.5.2	Coefficient of Variation	186
	References.....	188
8	Presentation of Variation by Figures	189
8.1	Graphs for Frequency Distribution.....	190
8.1.1	Histogram and Its Variants	190
8.1.1.1	Histogram.....	190
8.1.1.2	Stem-and-Leaf Plot.....	192
8.1.1.3	Line Histogram.....	192
8.1.2	Polygon and Its Variants.....	192
8.1.2.1	Frequency Polygon.....	193
8.1.2.2	Area Diagram	193
8.1.3	Frequency Curve	193
8.2	Pie, Bar, and Line Diagrams.....	194
8.2.1	Pie Diagram.....	194
8.2.1.1	Useful Features of Pie Diagram.....	194
8.2.2	Bar Diagram	195
8.2.3	Scatter and Line Diagrams.....	197
8.2.3.1	Scatter Diagram.....	197
8.2.3.2	Line Diagram	198
8.2.3.3	Complex Line Diagrams	199
8.2.4	Choice and Cautions in Visual Display of Data.....	200

8.2.5	Mixed and Three-Dimensional Diagrams.....	202
8.2.5.1	Mixed Diagram	202
8.2.5.2	Box-and-Whiskers Plot	202
8.2.5.3	Three-Dimensional Diagram	204
8.2.5.4	Biplot.....	204
8.2.5.5	Nomogram.....	204
8.3	Special Diagrams in Health and Medicine	206
8.3.1	Diagrams Used in Public Health.....	206
8.3.1.1	Epidemic Curve.....	206
8.3.1.2	Lexis Diagram.....	207
8.3.2	Diagrams Used in Individual Care and Research.....	208
8.3.2.1	Growth Charts	208
8.3.2.2	Partogram	209
8.3.2.3	Dendrogram.....	210
8.4	Charts and Maps	211
8.4.1	Charts	211
8.4.1.1	Schematic Chart	212
8.4.1.2	Pedigree Chart.....	212
8.4.2	Maps.....	213
8.4.2.1	Spot Map	213
8.4.2.2	Thematic Choroplethic Map	214
8.4.2.3	Cartogram.....	215
	References	215

9 Some Quantitative Aspects of Medicine 219

9.1	Some Epidemiological Measures of Health and Disease	220
9.1.1	Epidemiological Indicators of Neonatal Health.....	221
9.1.1.1	Birth Weight.....	221
9.1.1.2	Apgar Score.....	222
9.1.2	Epidemiological Indicators of Growth in Children	222
9.1.2.1	Weight-for-Age	223
9.1.2.2	Weight-for-Height and Height-for-Age	223
9.1.2.3	Z-Scores and Percent of Median.....	223
9.1.2.4	Growth Velocity.....	225
9.1.2.5	Skinfold Thickness.....	226
9.1.2.6	Development	226
9.1.3	Epidemiological Indicators of Adolescent Health	226
9.1.3.1	Growth in Height and Weight in Adolescence.....	227
9.1.3.2	Sexual Maturity Rating	227
9.1.4	Epidemiological Indicators of Adult Health.....	227
9.1.4.1	Obesity	227
9.1.4.2	Smoking	228
9.1.4.3	Physiological Functions	231
9.1.4.4	Quality of Life.....	231
9.1.5	Epidemiological Indicators of Geriatric Health	232
9.1.5.1	Activities of Daily Living	232

	9.1.5.2	Mental Health of the Elderly.....	233
9.2		Reference Values	233
	9.2.1	Gaussian and Other Distributions	233
		9.2.1.1 Properties of a Gaussian Distribution	234
		9.2.1.2 Other Distributions	235
	9.2.2	Reference or Normal Values.....	236
		9.2.2.1 Implications of Normal Values	237
	9.2.3	Normal Range	237
		9.2.3.1 Disease Threshold	238
		9.2.3.2 Clinical Threshold	238
		9.2.3.3 Statistical Threshold	239
9.3		Measurement of Uncertainty: Probability.....	241
	9.3.1	Elementary Laws of Probability	241
		9.3.1.1 Law of Multiplication.....	241
		9.3.1.2 Law of Addition	242
	9.3.2	Probability in Clinical Assessments.....	244
		9.3.2.1 Probabilities in Diagnosis.....	244
		9.3.2.2 Forwarding Diagnosis	246
		9.3.2.3 Assessment of Prognosis	247
		9.3.2.4 Choice of Treatment.....	247
	9.3.3	Further on Diagnosis: Bayes' Rule.....	247
		9.3.3.1 Bayes' Rule	248
		9.3.3.2 Extension of Bayes' Rule.....	249
9.4		Validity of Medical Tests	251
	9.4.1	Sensitivity and Specificity.....	251
		9.4.1.1 Features of Sensitivity and Specificity	252
		9.4.1.2 Likelihood Ratio.....	253
	9.4.2	Predictivities.....	254
		9.4.2.1 Positive and Negative Predictivity	254
		9.4.2.2 Predictivity and Prevalence	255
		9.4.2.3 The Meaning of Prevalence for Predictivity	257
		9.4.2.4 Features of Positive and Negative Predictivities.....	257
	9.4.3	Combination of Tests.....	259
		9.4.3.1 Tests in Series.....	259
		9.4.3.2 Tests in Parallel	260
		9.4.3.3 Gains from a Test.....	260
		9.4.3.4 When Can a Test Be Avoided?.....	262
	9.4.5	Search for the Best Criterion: ROC Curve.....	263
		9.4.5.1 Sensitivity–Specificity Based ROC Curve.....	263
		9.4.5.2 Predictivities Based ROC Curve.....	265

21.4	Misinterpretation	715
21.4.1	Misuse of <i>P</i> -Values.....	715
21.4.1.1	Magic Threshold 0.05	715
21.4.1.2	One-Tail or Two-Tail <i>P</i> -Values	716
21.4.1.3	Multiple Comparisons	716
21.4.1.4	Dramatic <i>P</i> -Values	716
21.4.1.5	<i>P</i> -Values for Nonrandom Sample	716
21.4.1.6	“Normal” with Respect to Several Parameters	717
21.4.2	Correlation versus Cause–Effect Relationship.....	717
21.4.2.1	Criteria for Cause–Effect	718
21.4.2.2	Other Considerations.....	719
21.4.3	Sundry Issues	720
21.4.3.1	Diagnostic Test Is Only an Additional Adjunct.....	720
21.4.3.2	Medical Significance versus Statistical Significance	720
21.4.3.3	Interpretation of Standard Error (<i>p</i>).....	721
21.4.3.4	Univariate Analysis but Multivariate Conclusions	721
21.4.3.5	Limitation of Relative Risk.....	722
21.4.4	Final Comments	722
