Medical Biostatistics,Third Edition (2012)

Contents

List of Figures..... xxix
List of Tables.....xxxvii
Preface..... xlv
Summary Tables..... xlix
Frequently Used Notations..... lvii

1. **Medical Uncertainties**.....1
   1.1. Uncertainties in Health and Disease.....3
      1.1.1. Uncertainties due to Intrinsic Variation.....3
         1.1.1.1. Biologic Variability.....3
         1.1.1.2. Genetic Variability.....4
         1.1.1.3. Variation in Behavior and Other Host Factors..... 4
         1.1.1.4. Environmental Variability.....4
         1.1.1.5. Chance Variability.....5
         1.1.1.6. Sampling Fluctuations.....5
      1.1.2. Natural Variation in Assessment.....6
         1.1.2.1. Observer Variability.....6
         1.1.2.2. Variability in Treatment Strategies.....6
         1.1.2.3. Instrument and Laboratory Variability.....7
         1.1.2.4. Imperfect Tools.....7
         1.1.2.5. Incomplete Information on the Patient.....8
         1.1.2.6. Poor Compliance with the Regimen.....8
      1.1.3. Inadequate Knowledge.....8
         1.1.3.1. Epistemic Uncertainties.....9
         1.1.3.2. Diagnostic, Therapeutic, and Prognostic Uncertainties.....9
         1.1.3.3. Predictive and Other Uncertainties..... 10
   1.2. Uncertainties in Medical Research..... 10
      1.2.1. Empiricism in Medical Research..... 11
         1.2.1.1. Laboratory Experiments..... 11
         1.2.1.2. Clinical Trials..... 11
         1.2.1.3. Surgical Procedures.....12
         1.2.1.4. Epidemiological Research.....12
      1.2.2. Elements of Minimizing the Impact of Uncertainties on Research.....12
         1.2.2.1. Proper Design.....13
         1.2.2.2. Improved Medical Methods.....13
         1.2.2.3. Analysis and Synthesis..... 14
   1.3. Uncertainties in Health Planning and Evaluation..... 15
      1.3.1. Health Situation Analysis..... 16
         1.3.1.1. Identification of the Specifics of the Problem..... 16
         1.3.1.2. Size of the Target Population.....16
         1.3.1.3. Magnitude of the Problem.....17
         1.3.1.4. Health Infrastructure.....18
         1.3.1.5. Feasibility of Remedial Steps..... 18
      1.3.2. Evaluation of Health Programs..... 19
   1.4. Management of Uncertainties: About This Book.....20
      1.4.1. Contents of the Book..... 21
         1.4.1.1. Chapters.....21
         1.4.1.2. Limitations and Strengths.....23

1.4.1.3. New in the Third Edition..... 24
1.4.2. Salient Features of the Text.....25
1.4.2.1. System of Notations.....25
1.4.2.2. Guide Chart of the Biostatistical Methods.....27
References.....27
2. **Basics of Medical Studies**.....29
2.1. Study Protocol.....30
2.1.1. Problem, Objectives, and Hypotheses.....30
2.1.1.1. Problem.....30
2.1.1.2. Broad and Specific Objectives.....31
2.1.1.3. Hypotheses..... 32
2.1.2. Protocol Content..... 32
2.2. Types of Medical Studies.....36
2.2.1. Elements of Design.....36
2.2.2. Basic Types of Study Design.....38
2.2.2.1. Descriptive Studies.....38
2.2.2.2. Analytical Studies.....40
2.2.2.3. Basic Types of Analytical Studies.....40
2.2.3. Choosing a Design..... 41
2.2.3.1. Recommended Design for Particular Setups.....42
2.2.3.2. Choice of Design by Level of Evidence.....42
2.3. Data Collection.....44
2.3.1. Nature of Data.....45
2.3.1.1. Factual, Knowledge-Based, and Opinion-Based Data.....45
2.3.1.2. Method of Obtaining the Data.....46
2.3.2. Tools of Data Collection.....47
2.3.2.1. Existing Records.....47
2.3.2.2. Questionnaires and Schedules.....49
2.3.2.3. Likert Scale..... 51
2.3.3. Pretesting and Pilot Study..... 52
2.4. Nonsampling Errors and Other Biases.....53
2.4.1. Nonresponse.....53
2.4.2. Variety of Biases to Guard Against.....54
2.4.2.1. List of Biases.....54
2.4.2.2. Steps for Minimizing Bias.....60
References..... 61
3. **Sampling Methods**.....63
3.1. Sampling Concepts.....63
3.1.1. Advantages and Limitations of Sampling.....64
3.1.1.1. Sampling Fluctuations.....64
3.1.1.2. Advantages of Sampling.....65
3.1.1.3. Limitations of Sampling.....65
3.1.2. Some Special Terms Used in Sampling.....65
3.1.2.1. Unit of Inquiry and Sampling Unit.....65
3.1.2.2. Sampling Frame.....66
3.1.2.3. Parameters and Statistics.....66
3.1.2.4. Sample Size.....66
3.1.2.5. Nonrandom and Random Sampling..... 67
3.2. Common Methods of Random Sampling..... 67
3.2.1. Simple Random Sampling.....67
3.2.2. Stratified Random Sampling.....68
3.2.3. Multistage Random Sampling.....71
3.2.4. Cluster Random Sampling.....73
3.2.5. Systematic Random Sampling.....75
3.2.6. Choice of Method of Random Sampling..... 76

3.3. Some Other Methods of Sampling.....77
3.3.1. Other Random Methods of Sampling.....78
3.3.1.1. Probability Proportional to Size Sampling.....78
3.3.1.2. Area Sampling.....79
3.3.1.3. Inverse Sampling.....79
3.3.1.4. Consecutive Subjects Attending a Clinic.....79
3.3.1.5. Sequential Sampling.....80
3.3.2. Nonrandom Methods of Sampling.....80
3.3.2.1. Convenience Samples.....80
3.3.2.2. Other Types of Purposive Samples..... 81
References.....82
4. **Designs for Observational Studies**.....83
4.1. Some Basic Concepts.....83
4.1.1. Antecedent and Outcome.....83
4.1.2. Confounders.....84
4.1.3. Effect Size.....86
4.2. Prospective Studies.....86
4.2.1. Variations of Prospective Studies.....87
4.2.1.1. Cohort Study.....87
4.2.1.2. Longitudinal Study.....89
4.2.1.3. Repeated Measures Study.....89
4.2.2. Selection of Subjects for a Prospective Study.....90
4.2.2.1. Comparison Group in a Prospective Study.....90
4.2.3. Potential Biases in Prospective Studies..... 91
4.2.3.1. Selection Bias..... 91
4.2.3.2. Bias due to Loss in Follow-Up.....92
4.2.3.3. Assessment Bias and Errors.....92
4.2.3.4. Bias due to Change in the Status.....93
4.2.3.5. Confounding Bias.....93
4.2.3.6. Post Hoc Bias.....93
4.2.3.7. Validity Bias.....93
4.2.4. Merits and Demerits of Prospective Studies.....94
4.2.4.1. Merits of Prospective Studies.....94
4.2.4.2. Demerits of Prospective Studies.....94
4.3. Retrospective Studies.....95
4.3.1. Case–Control Design.....96
4.3.1.1. Nested Case–Control Design.....97
4.3.2. Selection of Cases and Controls.....98
4.3.2.1. Selection of Cases.....98
4.3.2.2. Selection of Controls.....98
4.3.2.3. Sampling Methods in Retrospective Studies..... 99
4.3.2.4. Confounders and Matching..... 100
4.3.3. Merits and Demerits of Case–Control Studies..... 101
4.3.3.1. Merits of Case–Control Studies.....102
4.3.3.2. Demerits of Case–Control Studies..... 102
4.4. Cross-Sectional Studies..... 102
4.4.1. Selection of Subjects for a Cross-Sectional Study..... 103
4.4.2. Merits and Demerits of Cross-Sectional Studies..... 104
4.4.2.1. Demerits of Cross-Sectional Studies.....104
4.4.2.2. Merits of Cross-Sectional Studies..... 105
4.5. Comparative Performance of Prospective, Retrospective, and Cross-Sectional Studies..... 105
4.5.1. Performance of Prospective Studies..... 106
4.5.2. Performance of Retrospective Studies..... 107
4.5.3. Performance of Cross-Sectional Studies..... 108
4.5.4. Reporting Results of Observational

Studies—STROBE.....109
References..... 109
5. **Medical Experiments**..... 111
5.1. Basic Features of Medical Experiments..... 112
5.1.1. Statistical Principles of Experimentation..... 113
5.1.1.1. Control Group..... 113
5.1.1.2. Randomization..... 114
5.1.1.3. Replication..... 115
5.1.2. Advantages and Limitations of Experiments..... 115
5.1.2.1. Advantages..... 115
5.1.2.2. Limitations..... 116
5.2. Design of Experiments..... 116
5.2.1. Classical Designs: One Way, Two Way, and Factorial..... 117
5.2.1.1. One-Way Design..... 118
5.2.1.2. Two-Way Design..... 118
5.2.1.3. Interaction..... 119
5.2.1.4. *K*-Way and Factorial Experiments..... 121
5.2.2. Some Unconventional Designs.....122
5.2.2.1. Repeated Measures Design.....123
5.2.2.2. Crossover Design.....123
5.2.2.3. Other Complex Designs..... 126
5.3. Choice and Sampling of Units for Laboratory Experiments..... 126
5.3.1. Choice of Experimental Unit..... 126
5.3.2. Sampling Methods in Laboratory Experiments..... 127
5.3.3. Choosing a Design of Experiment..... 128
5.3.4. Pharmacokinetic Studies..... 128
References.....130
6. **Clinical Trials**..... 131
6.1. Therapeutic Trials..... 132
6.1.1. Phases of a Clinical Trial..... 132
6.1.1.1. Phase I Trial.....132
6.1.1.2. Phase II Trial.....133
6.1.1.3. Phase III Trial.....133
6.1.1.4. Phase IV: Postmarketing Surveillance..... 134
6.1.2. Selection of Subjects..... 135
6.1.2.1. Selection of Participants for RCT..... 135
6.1.2.2. Control Group in a Clinical Trial..... 136
6.1.3. Randomization and Matching..... 138
6.1.3.1. Randomization..... 139
6.1.3.2. Matching..... 139
6.1.4. Methods of Random Allocation..... 141
6.1.4.1. Allocation Out of a Large Number of Available Subjects..... 141
6.1.4.2. Random Allocation of Consecutive Patients Coming to a Clinic..... 142
6.1.4.3. Block, Cluster, and Stratified Randomization..... 143
6.1.5. Blinding and Masking..... 144
6.1.5.1. Blinding..... 144
6.1.5.2. Masking..... 145
6.2. Issues in Clinical Trials..... 146
6.2.1. Outcome Assessment..... 146
6.2.1.1. Specification of End Points or Outcome.....146
6.2.1.2. Causal Inference.....147
6.2.1.3. Side Effects.....148

6.2.1.4. Effectiveness versus Efficacy.....148
6.2.1.5. Pragmatic Trials..... 148
6.2.2. Various Equivalences in Clinical Trials..... 149
6.2.2.1. Superiority, Equivalence, and Noninferiority Trials..... 149
6.2.2.2. Therapeutic Equivalence and Bioequivalence.....151
6.2.3. Designs for Clinical Trials..... 151
6.2.3.1. One-Way, Two-Way, and Factorial Designs.....152
6.2.3.2. Crossover and Repeated Measures Designs.....153
6.2.3.3. N-of-1, Up-and-Down, and Sequential Designs.....154
6.2.3.4. Choosing a Design for a Clinical Trial..... 156
6.2.4. Designs with Interim Appraisals..... 155
6.2.4.1. Designs with Provision to Stop Early..... 157
6.2.4.2. Adaptive Designs..... 158
6.2.5. Biostatistical Ethics for Clinical Trials..... 159
6.2.5.1. Equipoise.....160
6.2.5.2. Ethical Cautions.....161
6.2.5.3. Statistical Considerations in a Multicentric Trial.....161
6.2.5.4. Multiple Treatments with Different Outcomes in the Same Trial.....162
6.2.5.5. Size of the Trial.....162
6.2.5.6. Compliance..... 163
6.2.6. Reporting Results of a Clinical Trial..... 163
6.2.6.1. CONSORT.....163
6.2.6.2. Registration of Trials and Open Access..... 164
6.3. Trials Other than for Therapeutics.....165
6.3.1. Clinical Trials for Diagnostic and Prophylactic Modalities..... 165
6.3.1.1. Diagnostic Trials.....166
6.3.1.2. Prophylactic Trials in Clinics..... 167
6.3.2. Field Trials for Screening, Prophylaxis, and Vaccines..... 167
6.3.2.1. Screening Trials.....167
6.3.2.2. Prophylactic Trials in the Field.....168
6.3.2.3. Vaccine Trials..... 169
6.3.3. Issues in Field Trials..... 169
6.3.3.1. Randomization and Blinding in Field Trials.....170
6.3.3.2. Designs for Field Trials..... 170
References..... 170
7. **Numerical Methods for Representing Variation**..... 173
7.1. Types of Measurement..... 173
7.1.1. Nominal, Metric, and Ordinal Scales.....174
7.1.1.1. Nominal Scale.....174
7.1.1.2. Metric Scale.....174
7.1.1.3. Ordinal Scale.....175
7.1.1.4. Grouping of a Metric Scale (Categorizing Continuous Measurements)..... 176
7.1.2. Other Classifications of the Types of Measurement..... 178
7.1.2.1. Discrete and Continuous Variables.....179
7.1.2.2. Qualitative and Quantitative Data.....180
7.1.2.3. Stochastic and Deterministic Variables..... 180
7.2. Tabular Presentation..... 181
7.2.1. Contingency Tables and Frequency Distribution..... 182
7.2.1.1. Empty Cells.....183
7.2.1.2. Problems in Preparing a Contingency Table

on Metric Data.....183
7.2.2. Multiple Response Tables and Other Features..... 184
7.2.2.1. Features of a Table..... 185
7.2.3. Other Types of Statistical Tables..... 186
7.2.3.1. What Is a Good Statistical Table?..... 186
7.3. Rates and Ratios..... 187
7.3.1. Proportion, Rate, and Ratio..... 187
7.3.1.1. Proportion.....187
7.3.1.2. Rate.....188
7.3.1.3. Ratio..... 189
7.4. Central and Other Locations..... 189
7.4.1. Central Values: Mean, Median, and Mode..... 189
7.4.1.1. Understanding Mean, Median, and Mode.....190
7.4.1.2. Calculation in Case of Grouped Data.....191
7.4.1.3. Which Central Value to Use?.....192
7.4.1.4. Geometric Mean.....195
7.4.1.5. Harmonic Mean..... 195
7.4.2. Other Locations: Quantiles..... 197
7.4.2.1. Quantiles in Ungrouped Data.....197
7.4.2.2. Quantiles in Grouped Data.....197
7.4.2.3. Interpretation of Quantiles..... 199
7.5. Measuring Variability.....201
7.5.1. Variance and Standard Deviation..... 202
7.5.1.1. Variance and Standard Deviation in Ungrouped Data..... 202
7.5.1.2. Variance and Standard Deviation in Grouped Data.....204
7.5.1.3. Variance of Sum or Difference of Two Measurements.....204
7.5.1.4. Measuring Variation in Skewed and Nominal Data.....206
7.5.2. Coefficient of Variation.....206
References.....208
8. **Presentation of Variation by Figures**..... 211
8.1. Graphs for Frequency Distribution.....212
8.1.1. Histogram and Its Variants.....212
8.1.1.1. Histogram..... 213
8.1.1.2. Stem-and-Leaf Plot.....213
8.1.1.3. Line Histogram..... 215
8.1.2. Polygon and Its Variants..... 215
8.1.2.1. Frequency Polygon.....215
8.1.2.2. Area Diagram..... 215
8.1.3. Frequency Curve..... 215
8.2. Pie, Bar, and Line Diagrams..... 216
8.2.1. Pie Diagram..... 216
8.2.1.1. Useful Features of Pie Diagram.....217
8.2.1.2. Donut Diagram..... 218
8.2.2. Bar Diagram..... 218
8.2.3. Scatter and Line Diagrams..... 221
8.2.3.1. Scatter Diagram.....221
8.2.3.2. Line Diagram.....222
8.2.3.3. Complex Line Diagrams.....223
8.2.4. Choice and Cautions in Visual Display of Data..... 224
8.2.5. Mixed and Three-Dimensional Diagrams.....226
8.2.5.1. Mixed Diagram.....226
8.2.5.2. Box-and-Whiskers Plot.....227

8.2.5.3. Three-Dimensional Diagram.....227
8.2.5.4. Biplot.....228
8.2.5.5. Nomogram.....228
8.3. Special Diagrams in Health and Medicine.....229
8.3.1. Diagrams Used in Public Health.....230
8.3.1.1. Epidemic Curve.....230
8.3.1.2. Lexis Diagram..... 231
8.3.2. Diagrams Used in Individual Care and Research.....233
8.3.2.1. Growth Charts.....233
8.3.2.2. Partogram.....233
8.3.2.3. Dendrogram.....233
8.3.2.4. Area under the Concentration Curve.....236
8.3.2.5. Radar Graph.....236
8.4. Charts and Maps..... 237
8.4.1. Charts..... 237
8.4.1.1. Schematic Chart.....237
8.4.1.2. Pedigree Chart.....238
8.4.2. Maps.....238
8.4.2.1. Spot Map.....239
8.4.2.2. Thematic Choroplethic Map.....240
8.4.2.3. Cartogram..... 241
References..... 242
9. **Some Quantitative Aspects of Medicine**..... 243
9.1. Some Epidemiological Measures of Health and Disease.....244
9.1.1. Epidemiological Indicators of Neonatal Health..... 245
9.1.1.1. Birth Weight..... 245
9.1.1.2. Apgar Score..... 246
9.1.2. Epidemiological Indicators of Growth in Children..... 246
9.1.2.1. Weight-for-Age.....247
9.1.2.2. Weight-for-Height and Height-for-Age.....247
9.1.2.3. *Z*-Scores and Percent of Median.....247
9.1.2.4. Growth Velocity.....249
9.1.2.5. Skinfold Thickness..... 249
9.1.3. Epidemiological Indicators of Adolescent Health.....250
9.1.3.1. Growth in Height and Weight in Adolescence..... 250
9.1.3.2. Sexual Maturity Rating..... 251
9.1.4. Epidemiological Indicators of Adult Health..... 251
9.1.4.1. Obesity.....251
9.1.4.2. Smoking.....252
9.1.4.3. Physiological Functions.....255
9.1.4.4. Quality of Life.....255
9.1.5. Epidemiological Indicators of Geriatric Health.....256
9.1.5.1. Activities of Daily Living.....256
9.1.5.2. Mental Health of the Elderly..... 257
9.2. Reference Values..... 257
9.2.1. Gaussian and Other Distributions..... 257
9.2.1.1. Properties of a Gaussian Distribution.....259
9.2.1.2. Other Distributions.....259
9.2.1.3. Checking Gaussianity: Simple but Approximate Methods..... 261
9.2.2. Reference or Normal Values.....263
9.2.2.1. Implications of Normal Values.....264
9.2.3. Normal Range.....265
9.2.3.1. Disease Threshold.....265
9.2.3.2. Clinical Threshold.....265

9.2.3.3. Statistical Threshold..... 267
9.3. Measurement of Uncertainty: Probability.....268
9.3.1. Elementary Laws of Probability..... 269
9.3.1.1. Law of Multiplication..... 269
9.3.1.2. Law of Addition..... 270
9.3.2. Probability in Clinical Assessments.....272
9.3.2.1. Probabilities in Diagnosis.....272
9.3.2.2. Forwarding Diagnosis.....274
9.3.2.3. Assessment of Prognosis.....274
9.3.2.4. Choice of Treatment..... 275
9.3.3. Further on Diagnosis: Bayes Rule..... 275
9.3.3.1. Bayes Rule.....275
9.3.3.2. Extension of Bayes Rule.....277
9.4. Validity of Medical Tests.....279
9.4.1. Sensitivity and Specificity.....280
9.4.1.1. Features of Sensitivity and Specificity.....281
9.4.1.2. Likelihood Ratio..... 282
9.4.2. Predictivities.....283
9.4.2.1. Positive and Negative Predictivity.....283
9.4.2.2. Predictivity and Prevalence.....285
9.4.2.3. Meaning of Prevalence for Predictivity.....287
9.4.2.4. Features of Positive and Negative Predictivities....287
9.4.3. Combination of Tests.....289
9.4.3.1. Tests in Series.....289
9.4.3.2. Tests in Parallel.....290
9.4.4. Gains from a Test..... 291
9.4.4.1. When Can a Test Be Avoided?..... 292
9.5. Search for the Best Threshold of Continuous Test: ROC Curve.....294
9.5.1. Sensitivity–Specificity-Based ROC Curve.....294
9.5.1.1. Methods to Find the "Optimal" Threshold Point..... 295
9.5.1.2. Area under the ROC Curve..... 298
9.5.2. Predictivity-Based ROC Curve..... 301
